OEM compact pressure switch With settable hysteresis Model PSM02

WIKA data sheet PV 34.82

Applications

- Hydraulics and mobile hydraulics
- Pneumatics
- Plastics injection moulding machines
- General machine building and plant construction
- Media: Compressed air, neutral and self-lubricating fluids, neutral gases

Special features

- High reproducibility
- Compact design
- Setting ranges from 0.2 ... 2 bar to 40 ... 400 bar
- Long service life due to high-quality micro switch
- Settable hysteresis

OEM compact pressure switch, with settable hysteresis, model PSM02

Description

Model PSM02 screw-in pressure switches in a diaphragm or piston variant open or close a circuit, depending on whether the pressure is dropping or rising. Two adjustment screws enable easy and convenient on-site setting of the required switch point and hysteresis. Optionally, WIKA offers its customers the factory setting of switch point and hysteresis.

Model PSM02 mechanical pressure switches are employed wherever compressed air, neutral and self-lubricating fluids or neutral gases are used and a precisely set hysteresis is needed.

The high reproducibility of the switch point of ± 2 % and the settability of the hysteresis makes the model PSM02 pressure switches interesting for all customers who place a value on precision as well as an attractive price.

Standard version

Case

Steel, galvanised

Reproducibility

±2 % of full scale value

Permissible temperature

Ambient: -20 ... +80 °C Medium: -20 ... +80 °C

Process connection

Steel, galvanised

G 1/8, G 1/4, 1/8 NPT, 1/4 NPT, R 1/8 or M10 x 1

Measuring element

Diaphragm or piston with compression spring

Sealing

Diaphragm: NBR or EPDM

Piston: PTFE (dynamic) and NBR, EPDM or Viton® (static)

Switch contacts

High-quality snap-action switch, self-cleaning

Switching function

Selectable: Normally open, normally closed, change-over

contact

Switching power

Switching voltage: DC / AC 24 ... 250 V Switching current: 5 mA ... 4 A

Electrical connection

Angular connector DIN 175301-803 A

Switching frequency

max. 100/min

Service life

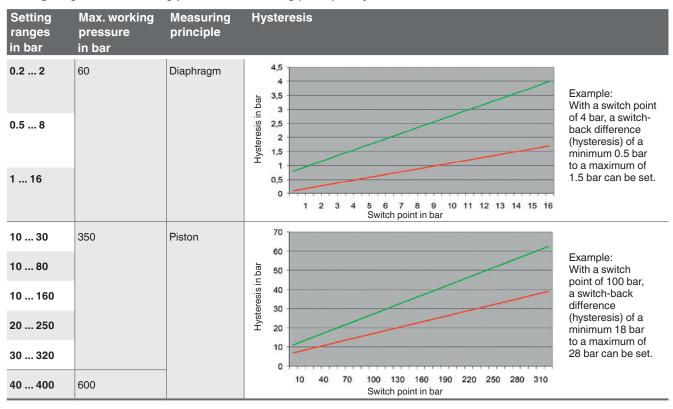

> 2 x 106 switching cycles

Ingress protection

IP 65 (IP 67 with electrical connection M12 x 1 or cable)

Viton® fluoroelastomer is a registered trademark of DuPont Performance Elastomers.

Setting ranges, max. working pressure, measuring principle, hysteresis

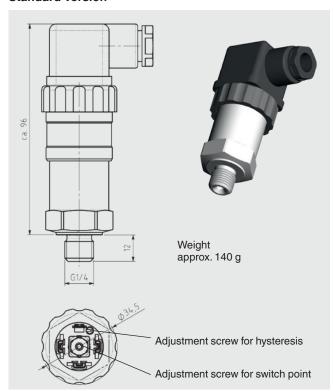

Options

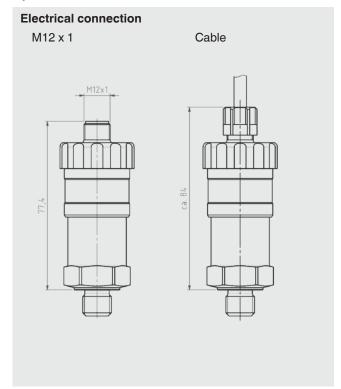

- Factory setting of switch point and hysteresis
- Case and process connection from stainless steel
- Other process connection
- Other materials on request
- Electrical connection M12 x 1 or cable
- Permissible ambient and medium temperature -30 ... +100 °C

Dimensions in mm

Standard version
